This item has the following features and specifications:

All units include an un-loader which reduces the start-up amps up to 80%, keeping electricity costs to a minimum. System is fully assembled at the factory, charged, run tested and wired, No additional components required. High efficiency compressors, low running costs, Lower maintenance cost and workload. Simple, quick installation with no piping or loose components to install gives you savings on labour. Installs in a fraction of the time it takes to install a split system, Come with a power cord, ready to plug in. Units are in their own enclosures and look very neat. Very low noise levels compared to conventional units.

*We supply our clients with an industrial blower to clean condensers (blow out the dust to prevent it from overheating) in order for them, to service their units themselves. It is a big saving in the long run and very easy and quickly to do. This needs to be done at least four times per year. We can therefore – with great confidence – give our clients a two year guarantee on our compressors.

Power supply: 220V Single phase

Temperature range: 0°C to +5°C in cold rooms, and -15°C -18°C in freezer rooms.

Ambient temperature: + 38°C

Input temperature of products: Room temperature

Need: Window and fresh air for heat transferring & a level floor surface to erect the room

Optional extras: At a minimal cost you can smarten up your room

Make use of a glass door instead of a swing door; equip it with shelving, Meat rails & Hooks.

If you want to expand your existing room - just add more panels, and if necessary another refrigeration pack!
